WRAITH TACTICAL

Out-Of-The-Box Setup

Unzip both zippers to open the pack. Locate and disconnect all 2" Fastex buckles and then remove front panel from pack. Unstrap and flip over MOLLE flap at the bottom to reveal Standard strap. Remove strap from pack.

Insert strap into pack sleeve and secure with Velcro patch inside.

Find strap on the right shoulder strap and remove from slide fastener at the top of the pack.

Thread the slide fastener back through elastic opening in the top of the pack and into the inner pack.

This is what you should see once threaded

Thread strap through slide fastener and secure with Velcro strap on top. Place the front panel 2" Fastex buckle into this strap and adjust height of plate to the user.

Connect the 2" Fastex from the back panel to the front panel as shown.

Insert Med bag in back compartment and attach the lower velcro portion pictured

Secondly affix the med bag to the upper velcro and dress the outer portions of the pack itself.
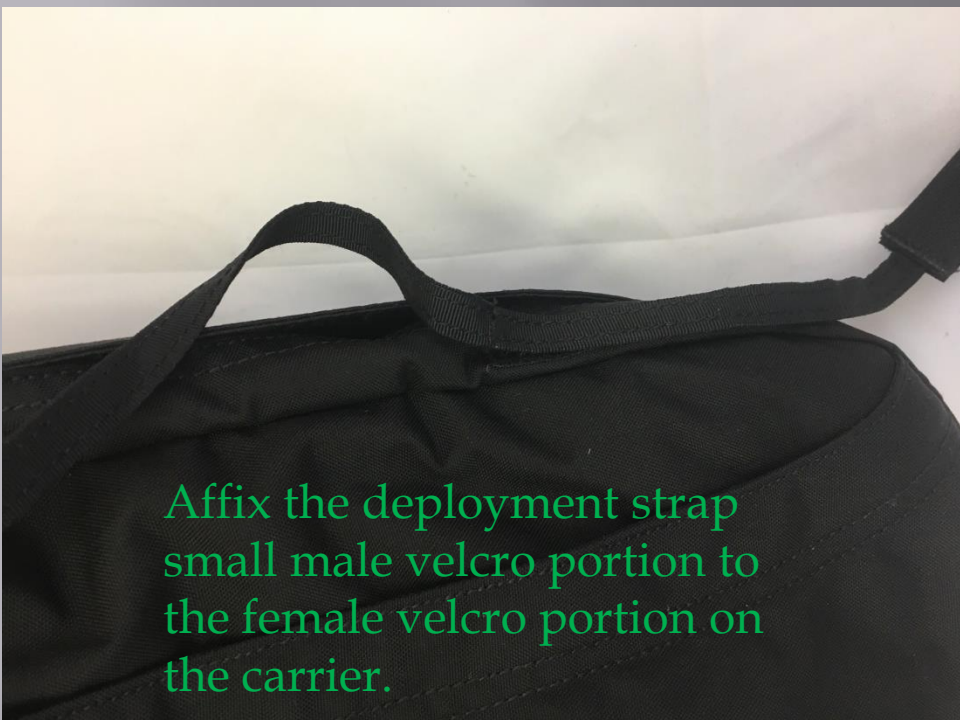

Now attach the med bag deployment strap by folding over the strap as shown
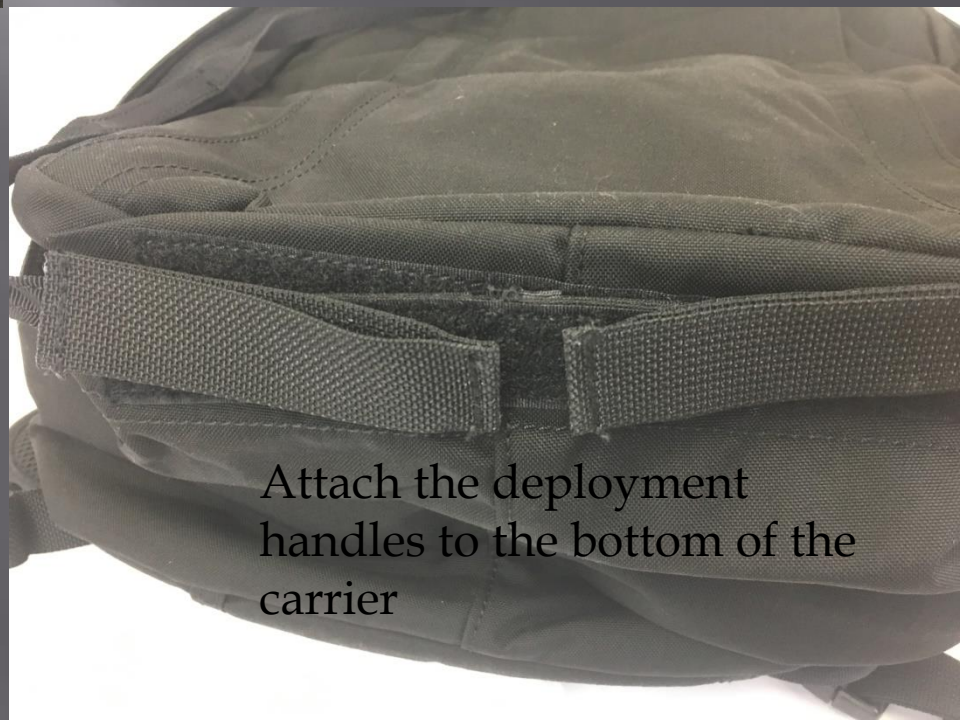

Flip the front panel over to meet up with the back panel

Zip up both side of the pack to meet in the middle of the top

Affix the deployment strap small male velcro portion to the female velcro portion on the carrier.

Attach the deployment handles to the bottom of the carrier

Your CARR pack is now completely set up and ready for deployment!
